Why Study In New Zealand?

STUDY IN
NEW ZEALAND

New Zealand is fast emerging as an attractive study abroad destination for international students. New Zealand Universities, Institutes of Technology and other educational institutions are known for the unique learning environment they provide. Over the past few years there has been a consistent growth in the number of overseas students choosing New Zealand as their study abroad destination. New Zealand is a modern, secular, democratic society with no ingrained class system. It has a clean, green, warm, friendly and safe environment. Today, people from over 145 countries call New Zealand their home.

New Zealand provides education at relatively low cost. The cost of living is low and the quality of life is good. There are no language barriers and you will find plenty of easy part time job opportunities while studying. The approximate tuition fee per year is NZ\$ 15000 (Rs 4,65,000) and living expenses NZ\$ 12,000 (Rs 3,72,000).

The potency of New Zealand for foremost learning has been brought out lately since the education structure of this English-speaking country concentrates on the British standards. Hence, scholars from the rest of the English-speaking nations will feel the courses of study of the top universities in New Zealand unproblematic to deal with. Widely known for its captivating outdoors, and impressive scenery, the nation which is abuzz with cafeterias, nightclubs and eateries has made its presence felt in the sphere of higher education as well. As said by the Ministry of Education, New Zealand, the prominent urban centers that attract the majority of international students include Christchurch, Wellington, and Auckland.

Students who look forward to study in New Zealand can go for institutes such as University of Auckland, Lincoln University, Victoria University of Wellington, and University of Canterbury. Although there are quite a few other institutes accessible for aspirants, the aforementioned names belong to the list of top universities in New Zealand.

If you have a strong desire to study in New Zealand, you should definitely take into account the University of Auckland (UoA), the largest educational establishment right now with above 39,000 students registered. The university has one chief campus in the middle of Auckland and 4 other campuses for pupils with specializations. There are over 5,000 foreign students from more than 90 countries continuing different programs in this educational institution. You can choose your desired one from a wide array of courses provided on arts, science, education, business administration, medical and

health sciences, engineering, bioengineering, and theology. The UoA has obtained a high place in the listing of most excellent universities of the globe, as prepared by a renowned rating organization.

Founded in 1897, the Victoria University of Wellington derived its name from Queen Victoria. This olden establishment consists of 8 faculty departments such as science, practice of law, architecture and design, education, trade and administration, graduate research, humanities and social sciences, and engineering science. Of all these departments, the architecture and design has stamped its exclusivity by turning the principal center in NZ. Located in the capital of NZ, the university presents a lively ambiance both within and outside the campus. It ensures that scholars not only acquire a deep understanding of their disciplines, but they apply their understanding in their respective disciplines as well.

Situated in Christchurch, the industrialized city in the middle of an affluent agricultural area, the University of Canterbury was established in the year 1873. Initially known as the Canterbury College, the institution is counted among top universities in New Zealand because of its forward-looking research facilities, and a huge group of encouraging faculties. The university provides high quality teaching to more than 3,000 overseas students and 21,000 native students.

Various scholarships in New Zealand can be productive for scholars by lessening their financial burdens. Nevertheless, you have to apply for these financial aids much before because of their fixed seats. Foreign students can derive benefits from a maximum of 28 scholarships each year. The most popular scholarships in New Zealand comprise New Zealand International Doctoral Research Scholarships (NZIDRS) and Livestock Emissions & Abatement Research Network (LEARN) Fellowships.

The tertiary education to study in New Zealand is used to describe all aspects of post-school education and training. There are 36 public tertiary education institutions, including eight universities, twenty-one institutes of technology and polytechnics, four colleges of education, three wananga (Maori tertiary education institutions). There are also 46 industry training organizations, and approximately 895 private training establishments, which include private English language schools, registered by the New Zealand Qualifications Authority. Tertiary education in New Zealand offer courses at widely different levels, from transition programmes to postgraduate study and research.

A New Way of Learning

New Zealand's practical, hands-on way of learning gives graduates the skills that employers around the world value, including flexibility, creativity, teamwork, problem-solving, leadership and decision-making. New Zealand universities have strong ties with industry, so there are opportunities to build connections through work experience and work placements.

Academic Options

Studying in New Zealand is a great way to see the country while you gain new knowledge and skills. Courses are available for academic, professional and vocational studies at universities, polytechnics, teachers colleges, secondary schools and private training establishments.

Why Study in
New Zealand?

All students are exposed to a totally different outlook to education as there are several adventure schools around the country. As most Universities are in beautiful locations, they focus on outdoor sports and activities as well as personal development. From scuba diving and rock climbing to leadership and survival skills, the subject choices are inspiring.

World-Class Education

All eight of our universities are in the top 3% in the world, according to the QS world university rankings. New Zealand is the only country in the world to have all of its universities in the global top 500. The universities are distributed around the country, so you're sure to find one in a region that suits you.

Growing Destination

Campuses are highly international, with students from all corners of the globe studying together. The New Zealand government has opened doors to students from Europe, South East Asia, the UK, North Asia, Japan, South America, India, and Australia, amongst many others. Studying in New Zealand is becoming more popular destination for students comparable to UK, USA and Australia.

English Language Destination

New Zealand gives you the opportunity to study in an English-speaking environment and be taught by native English speakers. We have high-quality English language courses for all levels of ability.

Technically Advanced

New Zealand offers an education to help students take a leading place in the exciting global environment. Students are offered many state of the art facilities, and with many institutions spearheading several new technological developments, students have access to advanced technology during their academic tenure in new Zealand.

The People of New Zealand

New Zealand is safe, friendly, peaceful, politically stable and culturally diverse – you're sure to feel at home here. New Zealand is rated fourth in the world on the Global Peace Index and regularly top world quality-of-life surveys. Kiwis are some of the most amazing, loving, and welcoming people that you will ever meet. If you are a stranger, a native New Zealander is going to treat you like you are a friend. They are used to

meeting new people, first because they travel a lot themselves, and also because a lot of people come to visit New Zealand as well. The culture on the islands is quite laid back and easy going, as well. So you're not going to feel tense like you would if you went to a large city like London or New York City to study. There are just over 4 million people who reside on the country, and it is one of the safest places to live in the world. Another cool thing about the people is that there are so many different kinds of people. For being such a small country, the diversity is greater than you see in many European countries.

Work opportunities

There are plenty of work opportunities available for international students. On a student visa, you are allowed to work up to 20 hours a week through the semester; during vacations you can work up to 40 hours. So, instead of having to worry about finances, you get to supplement your education with income. You may even be able to nab internships and other practical work. The international studies office at your university can help you find a job to sustain you during your time in New Zealand. Another great thing is that you can get a permit at the end of your degree program and work for 12 months in the country under a special "work permit" that is alongside your student visa, which is what we'll look at closer in the last point.

Ease of Visa Acquisition and Residency

The visa acquisition process is incredibly simple, and unlike many other countries, you will not be rejected right away. You get to talk to people and tell them your side of the story if there is something that may prevent you from getting a visa to come into the country. If you can explain why you've decided to go down there and your international studies program helps you to create a Statement of Purpose (a statement you give to the visa officer to tell them why you are coming to New Zealand to study), you will usually get a visa. The country is welcome to immigration, more so than almost any other country in the world. The last advantage is that, after you graduate, as mentioned above, you can work in the country for up to a year. If the job you are working at is related to

the degree that you received, you can actually apply to get permanent residency, which you will most likely get within 6 months of your application.

Dependent Visas And Work Permits

The spouse of a student going for a skilled shortage course or a PG course is allowed to work full time.

Be Inspired Even as You Rest and Relax

Granted, studying overseas in New Zealand is not exactly a long-term vacation. But being in a new place is a great way to stay inspired. Plan your vacations well and you can explore the country's diverse wildlife and flora in natural ecosystems. New Zealand has breath-taking views of natural forested areas, hillsides, plains and pristine beaches. If you are feeling adventurous, take a hike on a nature trail or on volcanic plateaus.

As mentioned above, the scenic environments in New Zealand are ideal backdrops for stock photos! The textures and colors found in a natural environment can clear a cluttered mind. And even inspire you to create impressive artworks.

Education is one thing that is worth investing at any point of your life. The value of a good education is too precious and you will never regret for spending your time and money for education. Majority of us focuses more at getting better education and make our life more solid and secure. If you have got the proper education and talents they you are bound to succeed in any part of this world and this is what makes education more important in ones' life.
